

# The GenYES Administrator

Keys to Success

## What is GenYES?

GenYES is a research-based model for K-12 schools that addresses staff development and technology integration. Each GenYES student learns technical and collaborative skills and then partners with another teacher in your school. Teachers and staff members within the school can request technology assistance by accessing the GenYES TAP ( Technology Assisted Project) request link on your schools website. Teacher/student team work on a technology-infused projects that aligned to district or state curriculum standards. Student graduates of this course provide ongoing technology support lacking in many schools.

## GenYES

- Provides in-classroom support for teachers using technology to improve their lessons and curriculum
- Develops student leaders
- Models a collaborative relationship between students and staff
- Utilizes the energy and technological talents of today's youth
- Provides a cost effective, sustainable strategy for supporting your technology integration, technology support and staff development plans
- Shows your community that their technology investment is benefiting kids

## Successful GenYES administrators

- Allocate building and technology resources to support GenYES
- Empower, trust and learn from students
- Use GenYES students to implement new hardware and software initiatives
- Connect GenYES to school and district technology plans and professional development goals
- Make it a priority to promote GenYES to faculty, staff, parents, and others
- Reward and recognize GenYES students as leaders and partners in building a 21<sup>st</sup> century school
- Plan early for long-term sustainability
